**Write a complete sentence to answer each question below.
In your answer, use the vocabulary word in bold type.**

1. Why would a detective be **suspicious** if someone got caught telling a lie?

2. How does a detective make sure that **evidence** is not destroyed?

3. What does a detective give careful **consideration** to?

4. Will a detective **accuse** someone when all the clues are in?

5. Did the suspects come to the table only to **consume** a meal?

6. If Tanya has **allergies**, can she avoid sneezing at the crime scene?

7. Do detectives get **assignments** every day?

Now use one of the words above in a sentence of your own.

8. _____

Name _____

A story usually begins by introducing a character and the **problem** he or she has. The steps the character takes to solve the problem are the **events** of a story. A story ends with the **solution** to the problem. The problem, events, and solution make up the **plot** of a story.

Read the passage and each question. Underline the answer in the passage and then write the answer.

A box came in the mail for Denisha, but it had no return address. When Denisha opened the box, she found a blue jacket and matching pants. She tried on the pants and jacket. They fit perfectly, and blue was Denisha's favorite color. She wanted to thank the sender. She asked her mother and sister if they had mailed the package, but they both said no. Denisha looked again at the outside of the box, and then she smiled. "I figured it out! The stamp says that the box was mailed from Detroit. Grandma lives there. She must have sent it."

1. Who is the main character? _____
2. What is the problem? _____

3. What is the first thing Denisha does to solve her problem? _____

4. How does Denisha solve her problem? _____

5. What might happen next? _____

Name _____

As I read, I will pay attention to end punctuation in each sentence.

9 Todd's mother had a problem. "I've lost my favorite
 20 white scarf," she said. Todd wanted to help her find it.
 29 He searched under tables and behind chairs. He looked
 40 in closets and under the beds. He didn't see the scarf
 41 anywhere.
 49 Todd wasn't worried, however. He was an experienced
 60 detective. He had solved many cases in the past. Once he
 71 found his father's lost baseball cap behind an old paint can
 81 in the garage. Another time he found his mother's keys
 92 among the leaves of a houseplant. In fact Todd had solved
 103 every case he had ever worked on. He thought he could
 107 complete this assignment, too.
 116 Todd took out his handy detective notepad and pen.
 125 He asked his mother several questions, as any good
 127 detective would.

Comprehension Check

1. What problem is Todd trying to solve? **Problem and Solution**
2. How does Todd plan to find the scarf? **Problem and Solution**

A **chart** is a good way to organize information.

Erik asked third-, fourth-, and fifth-graders in his school what kind of mysteries they have solved. The chart below shows what he learned.

Use the information in the chart to answer the questions.

Kind of Mystery	Number of Students	Percent of Students
Found a missing object	47	58%
Found out who did something	21	27%
Found out what happened	12	15%

1. What kind of mystery did most students solve? _____

2. How many students found out what happened? _____
3. What percent of students found out who did it? _____
4. What percent of students found a missing object? _____
5. Were there more students who found out what happened or more students who found a missing item? _____

6. If some students said they had never solved a mystery, how would you change the chart? _____

Name _____

Look at this dictionary entry for an unfamiliar word. Use the definition and sample sentence to help answer the questions that follow.

purloin *verb* **1.** to steal; to take something secretly and without permission. *He planned to purloin the diamonds.*

1. What does *purloin* mean, in your own words?

2. Use *purloin* in another sentence.

3. How would you find the meaning of the word *abscond*?

4. Write the meaning of *abscond* below.

Choose three vocabulary words and use them in one sentence.

Name _____

The **main idea** of a selection tells you what it is all about. The supporting **details** in the selection help you to understand the main idea. The main idea is often, but not always, stated in the first sentence.

Read the passage and answer the questions that follow.

Many newborn rattlesnakes do not survive their first year of life. A baby rattlesnake is only about 10 inches long. Although they have short fangs and a poisonous bite, they are often eaten by birds and animals. The adult rattlesnakes do not raise their young. The young snakes are entirely on their own. Many die of hunger. In the winter they die if they do not find a warm place where they can hibernate.

1. What is the main idea of this passage?

2. What supporting details tell you how young rattlesnakes are in danger? List two details on the lines below.

3. What supporting detail tells you how baby rattlesnakes can survive in the winter?

4. What supporting detail tells you how baby rattlesnakes can attempt to defend themselves?

How does the information you wrote in the Main Idea Chart help you to summarize *A Walk in the Desert*?

Name _____

As I read, I will pay attention to tempo.

10 The Sahara is the world's largest desert. It is nearly
 20 the size of the United States. The Sahara extends over
 29 10 countries in northern Africa. Like all deserts, it gets
 fewer than 10 inches (24 cm) of rain a year.

37 In parts of the Sahara, you can see nothing but sand for
 49 miles. A sand dune forms when wind carries sand over a
 60 large rock. The sand drops, and gradually a hill of sand
 71 grows.

72 However, about 80 percent of the world's deserts are
 80 not sandy. This is true within the Sahara as well. Deserts
 91 begin as rock. The rock is worn away and broken apart by
 103 wind, rainstorms, and changing temperatures. Over time,
 110 the rock is broken into smaller and smaller pieces. The
 120 rock breaks down first into boulders, then into stones, and
 130 finally into sand. In some places, the Sahara is made up of
 142 huge rocks and gravel. 146

The **main idea** of a selection tells you what it is about.
The supporting **details** in the selection help you understand the main idea.

Read the paragraph below. Then identify the main idea and three details that support it.

Cumberland Gap National Park is under attack! A plant called *kudzu* threatens the park's ecosystem. Few animals eat kudzu and it grows so fast it's been called "the vine that ate the South." It can grow a foot a night! It grows even after it has been dosed with herbicide, or plant killer. That's bad news for native plants and trees. Kudzu grows right over them. It takes the sunlight plants need to live. Bits of kudzu came to Cumberland stuck to truck tires. The trucks were there to build a road. Now park rangers cut kudzu back. They apply herbicide to the plant's huge root. They could bring in goats because goats eat kudzu. But goats also eat native plants. Solving the kudzu problem will be tricky.

Understanding the **characters** and the **setting** can help you understand the **plot development**—what happens in a story.

Read the passage. Then answer the questions that follow.

When she was little, Andrea lived near the Kennedy Space Center. Her mother always took her there to watch the rockets launch. As Andrea grew up, she realized that she wanted to do more than just watch rocket launches. More than anything, she wanted to be an astronaut, but she wasn't sure that she could be one.

Her mother told her, "If you want something, the important thing is that you try your best." Andrea ate well and exercised. She studied hard in all her subjects. After college she learned to fly jet planes.

Andrea's dream came true. She became an astronaut and took many trips into space.

1. Who are the characters in this story?

2. What is the setting when Andrea is a little girl?

3. How did Andrea's mother help her achieve her goal?

4. In most plots, a character changes. How did Andrea change in the story?

When you are reading and come to a word you do not know, a dictionary can tell you what the word means and how to say it.

dis•tort (di stôrt´) *verb.* **1.** to twist the meaning of something. *The reporter distorts what people say.* **2.** to twist out of shape. *The mirror distorts my face when I look into it.*

A phonetic spelling tells you how to say the word. Notice that *distort* is divided into two parts. Each part is called a **syllable**.

The accent mark (´) after the second syllable shows you which syllable to stress when pronouncing the word.

Use the dictionary entry above to answer these questions.

1. Which meaning of *distort* do you find in the following sentence?

Eduardo twisted the hanger and distorted its shape.

a. Meaning #1

b. Meaning #2

2. True or false: *distort* has two syllables.

a. true

b. false

3. Which is the correct way to say *distort*?

a. di´ stôrt

b. di stôrt´

4. Use *distort* in a sentence of your own. Then write the number of the meaning you used.

I used meaning # ____.

The **setting**, where and when a story takes place, is important to the development of the plot. The setting can also affect the characters' experiences.

At last we arrived at the ocean cottage. My brother and I were too excited to look around the house. We ran out to explore the shore. There were tide pools and seaweed, and minnows swimming in a tide pool. When I stuck my hand in the water, the little fish darted under a piece of seaweed. Farther down the rocky coast, we saw a seal resting on a rock!

My brother and I were so excited about seeing the seal that we had a hard time falling asleep that night. The next morning we ran to find the seal again. It was gone! But then we heard barking. In the shallow water near the shore, a dark head looked at us, barked once again, and disappeared below the water.

1. Name the setting of the passage.

2. Who is the main character?

3. What happens in the first part of the story?

4. What important discovery do they make while they are exploring?

Readers **make inferences** to identify **author's purpose**. Authors write to **entertain**, to **inform**, to **explain**, or to **persuade**.

Read the passages and answer the questions.

Theo sat on the bench and watched as Molly went to bat. She took a big swing at the first pitch and missed. On the next pitch she surprised everyone and bunted the ball. It rolled slowly towards third base, and Molly sprinted to first. She got to first safely. Theo thought to himself, "Wow, that was pretty tricky. The fielders thought that she was going to hit the ball hard, so they weren't ready for that bunt. Maybe I could try that some time."

In both fiction and nonfiction stories, someone may face a **problem** then find a **solution**, or a way to solve it.

Read the passage. Then answer the questions that follow.

Wangari Maathai is an African woman who wanted to help her people. She knew that the land of her country, Kenya, needed more care. She also knew that many Africans did not have enough food. She had an idea. She got women to start planting trees. Since 1976 the Green Belt movement has helped 80,000 women plant and care for more than 20 million trees! The environment has improved, and people now eat the bananas, mangoes, and papayas that grow on the trees.

Tree planting is not the only way Maathai has helped the environment. When plans were made to build a skyscraper in Nairobi's only park, she organized demonstrations against it and wrote letters to stop it. She was put in jail, but her letters and the public protests stopped the building from being built. For her work Wangari has received many honors, including the Nobel Peace Prize.

When authors write, they have a **purpose**, or reason, for what they want their work to do. They write fiction to **entertain**. They write nonfiction to **inform** or **explain**. And they write essays to **persuade**.

Read the story excerpt below and decide on the author's purpose.

Squirrels did not always have big, bushy tails. Once upon a time, they had long, pointed tails, which did nothing to help them balance high up in the trees. Squirrels had to move slowly and were always afraid of falling. Also, they had to remember to hold up their tails or the scales that covered them would scrape against the tree bark and let predators know where they were.

Armadillos, on the other hand, had very bushy tails, but it was difficult to tuck all that lovely fur in when they had to roll up in protective little balls.

1. What was the author's purpose in writing this story? _____
2. How did you decide on the author's purpose? _____

3. If the author wanted to inform readers, what would the author write?

4. If the author wanted to persuade readers, what would the author write?

Recognizing **chronological order** helps you understand the sequence in which things happen in a story.

Read the passage below. Then number the sentences below to show the sequence of events.

The Plains Indians lived in North America before the Europeans came. Since they had no horses, the Plains Indians traveled on foot. To hunt buffalo, they would surround a herd and shoot the buffalo with bows and arrows.

This changed when Spanish explorers came to North America and brought horses with them. Now the Plains Indians hunters were able to ride horses and follow buffalo over long distances. They carried tipis with them and set up camps. The hunters could kill buffalo and pull them back to camp using their horses.

Later guns again changed the way that Plains Indians hunted.

1. _____ Spanish explorers brought horses to North America.
2. _____ The Plains Indians used horses and traveled long distances to hunt buffalo.
3. _____ The Plains Indians hunted buffalo on foot before the Europeans came to North America.

11 But there came a time when many days of heavy rain
19 made the Quillayute River overflow. The houses washed
19 away. Then the Quileute moved to the prairies.

27 Not long after, the weather grew cold. The rain turned
37 into hail and sleet. The fishermen could not break through
47 the ice in the rivers to go fishing. Falling hailstones were
58 so big that people were killed. The people grew afraid to
69 go outside. They were running out of food. Men, women,
79 and children were becoming weak and sick.

86 At this time, the Great Chief of the Quileute called a
97 meeting of all the people in the tribe. He stood before them
109 in a **patchwork** shawl made up of buffalo skins stitched
119 together. The people begged the chief to do something. The

Tipis

by Kendra Lundquist

The Plains Indians lived in the area now called the Midwest. They built tipis for their homes. These were upside-down cone shapes, built with long poles. Animal skins were pinned and fastened to the outside of the cone, providing a roomy home. The Plains Indians made fires within the tipis. They were usually built in a small fireplace. The walls of the tent reflected the heat back into the middle of the tipi so that a small fire kept the tipi very warm in winter.

You can identify the **main idea** and important **details** by summarizing a passage.

Read the passage and then answer the questions that follow.

Hail is small, round pieces of ice that fall to the ground like a shower of rain. Hail often falls in warm weather, even though it is frozen. There are snowflakes in clouds during thunderstorms. The snowflakes that fall melt in the warm air before they land on the ground. In some thunderstorms, raindrops stick to the snowflakes in the clouds and freeze. The frozen raindrop becomes a small ball of hail. As the small piece of hail begins to fall, air currents push it back up into the clouds. The hail falls through the clouds again. More rain attaches to the hail, and the hail gets bigger. This cycle can happen again and again. At a certain point, the hail is too heavy to be pushed back up. It leaves the cloud and falls to the ground. Hail doesn't melt on its way down. It travels too fast to warm up and turn into rain.

1. How does hail begin to form? _____

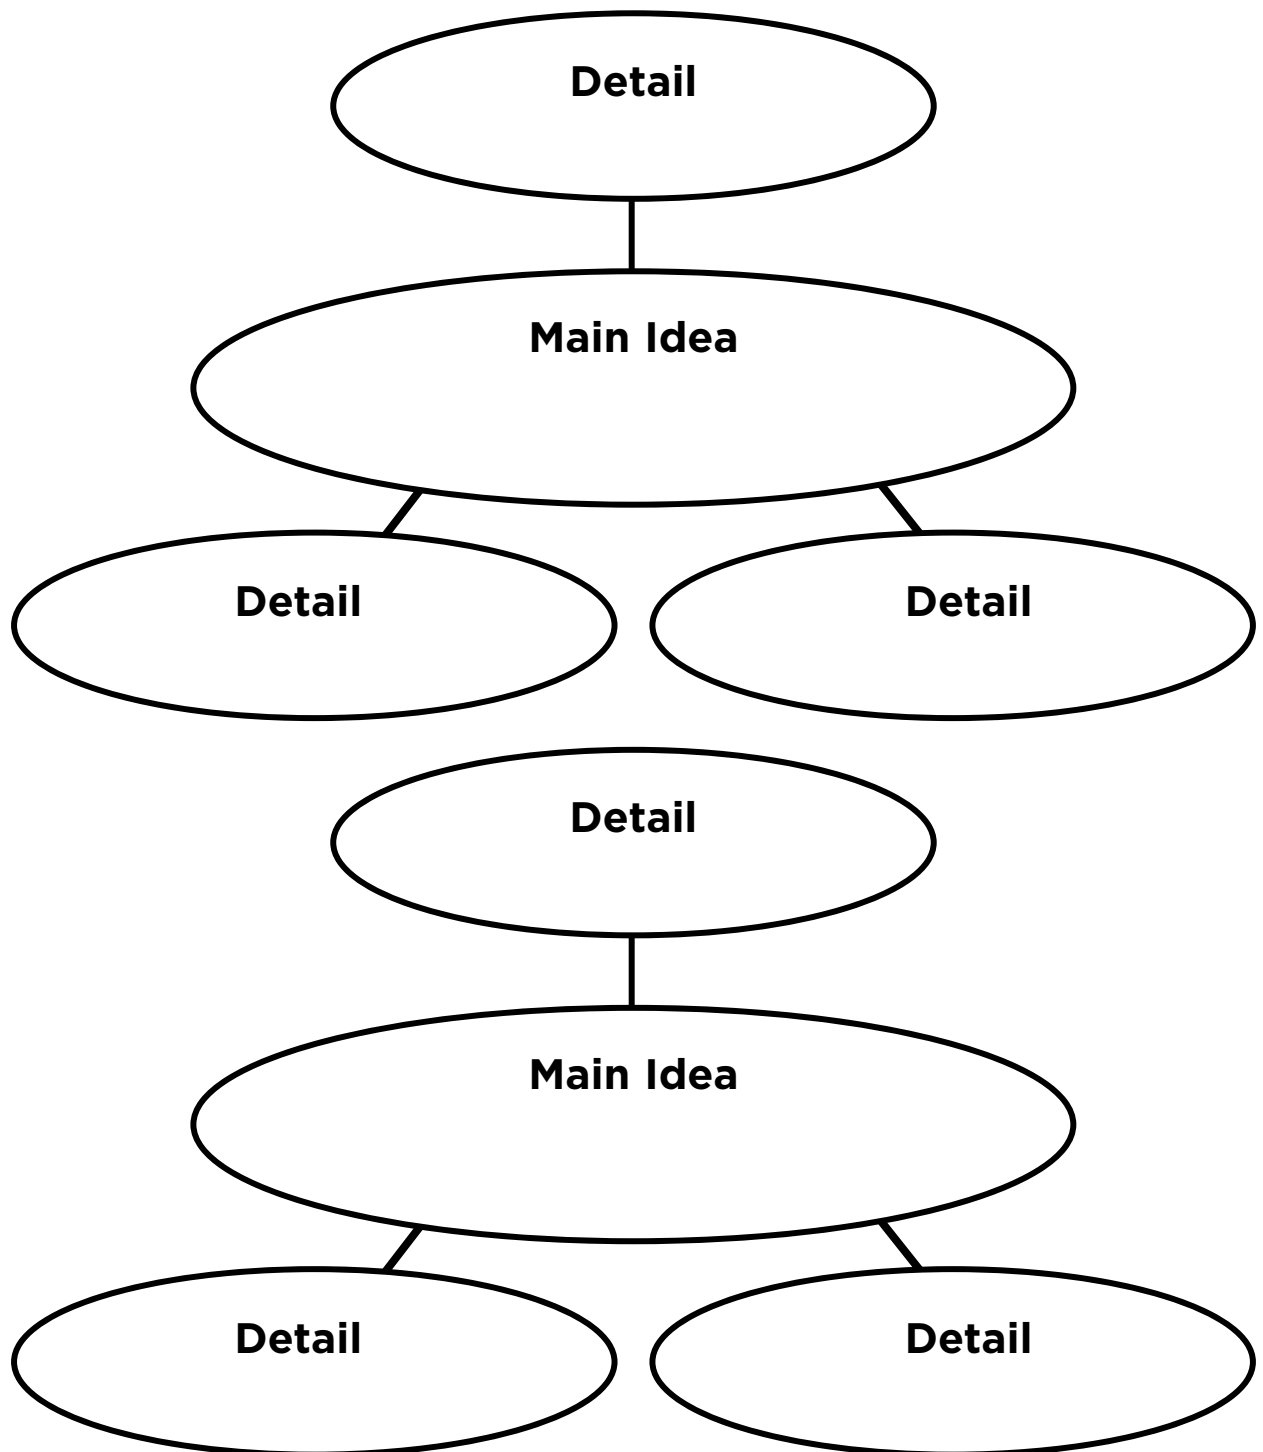

2. What happens as hail begins to fall? _____

3. When does the hail drop to the ground? _____

4. Why doesn't hail melt as it falls? _____

As I read, I will pay attention to the pronunciation of vocabulary words.

10 Tornadoes begin with warm, humid air. Humid air is air
 22 that holds a lot of moisture. This humid air meets up with
 33 colder air. As the air masses come together, the warm air
 44 rises. As the warm air moves upward, it holds more and
 52 more moisture. Huge, dark clouds called thunderheads begin
 62 to develop. These clouds can spread as wide as 100 miles
 73 (161 km) across the sky. There is so much moisture in the
 86 clouds that it can't just **evaporate** into the air. So it falls as
 94 rain. The thunderheads produce giant storms with thunder
 101 and lightning. These storms are called supercells.
 112 Winds high up in the storm clouds blow faster than the
 121 winds lower down. The winds also blow in different
 132 directions. This causes the air to spin. Then, as the winds
 142 spin, they form a long funnel cloud. However, one last
 153 thing needs to happen for the funnel cloud to become a
 160 tornado. It needs to touch the ground.

The **chronological order** of events in a story is the order in which things happen. Keeping track of the sequence, or order of events helps you make sense of what is happening in a story.

Read the story below. Then number the events that follow to show the chronological order.

Miranda's parents were planning a trip to Mexico to go whale watching. Miranda's mother bought airline tickets on a travel Web site. Miranda's father asked his boss for time off. Miranda asked a neighbor to feed the family pets. Miranda's mother asked the post office to hold their mail.

On the day of the trip, the family drove to the airport. They stood in line and went through security. Finally they boarded the airplane and took off for Mexico.

1. Miranda's mother asked the post office to hold the mail. _____
2. They stood in line and went through security. _____
3. The family boarded the plane and took off for Mexico. _____
4. Miranda's parents were planning a trip to Mexico. _____
5. Miranda's father asked his boss for time off. _____

Did you know that whales talk to each other? Whales
 10 make sounds for different reasons. Some sounds are used to
 20 locate calves. Others are used to find mates. Whales even use
 31 sounds to warn other pod members that a predator is around.
 42 Toothed whales click and whistle in order to locate food.
 52 Baleen whales make knocking, moaning, **snoring**, and
 59 **rumbling** noises. Humpback whales sing, but not during
 67 feeding season. They save their tunes for the warmer waters
 77 where they spend their breeding season. Some scientists
 85 believe they are singing love songs. Other scientists think
 94 they are sending out threats, like “Go away!” We may never
 105 know exactly why whales sing.
 110 Some humpback whales swim up to the surface and take
 120 a few breaths. Then they dive under the water and start to
 132 sing. They do not move when they sing. Their underwater
 142 songs can be heard for miles. Sometimes they sing for a half
 154 hour without stopping. 157

When you **compare** two things, you look at ways in which they are alike. When you **contrast** them, you focus on how they are different.

**Read the passage about sharks and dolphins below.
Then answer the questions that follow.**

Dolphins and sharks both live in the ocean, but they are different in many ways. Dolphins are not fish, but warm-blooded mammals. Dolphins have lungs and come up to the surface to breathe.

Sharks are fish, with gills instead of lungs. Some sharks live deep in the ocean, while others live near the surface.

Sharks and dolphins are alike in some ways, too. Both eat fish, and some kinds live together in rivers and lakes in Central and South America.

Compare sharks and dolphins and list two ways that they are alike.

Life in a tide pool is difficult. The **temperature** may
 10 range from very hot in the daytime to very cold at night.
 22 Twice a day, during high tide, ocean waves rush in and fill
 34 the tide pool with water. At low tide the water goes out
 46 again. The same tide pool may be completely dry.
 55 Tide pool animals must hang on tight at high tide and
 66 keep themselves wet at low tide. They must adapt to
 76 both heat and cold. And they must defend themselves
 85 against becoming another creature's lunch. Only the most
 93 adaptable tide pool animals can survive.
 99 The barnacle is an example of a true tide pool survivor.
 110 A barnacle is born swimming freely. But soon after that,
 120 it finds a rock or other hard surface in a tide pool. The
 133 animal cements itself there for life. 139

The order in which events happen in a story is the **chronological order**. To list events in chronological order, look for key words like *first*, *then*, and *last*.

Read the passage below. Then answer the questions that follow.

It was our town's worst storm. The next morning we saw our library had been struck by lightning and then caught fire. After seeing my favorite building in ruins, I decided something needed to be done.

First, I wrote a letter to our town's mayor. I emphasized the importance of having a library and why we needed to rebuild. Then, I decided to raise money. I asked some friends to help. Together, we baked cupcakes, washed cars, and collected money. I even got people to sign a petition—a piece of paper asking for something—saying that we needed to build a new library.

Finally, I took all the money we had raised along with the petition to the mayor's office. It turned out that the mayor had already been busy trying to design a new library. He was really impressed with all the work I had done and asked me to continue raising money for the new library!

Read the passage below. As you read, identify cause and effect. Then answer the questions below.

Carmen's fourth grade class was planning a play. Tryouts for the part of the prince had been held earlier. It was Carmen's job to figure out which of the boys made the best prince. "You should choose me," said Eddie. "If you do, tickets will sell out immediately."

"No, you should choose me," said Kevin. "I have the loudest voice and everyone will hear me."

Mitchell didn't say anything, but Carmen could see that he wanted the part, too.

Carmen started to feel bad about having to make a choice. "I don't think this should be my decision only," she thought. "Let's have the whole class vote on who should be the prince. And the other two boys can be attendants of the prince! This way no one is left out."

Boyd and Jarrett are both football fans.

Contrast is when you tell how two or more things, ideas, or people are different.

Borja is a better swimmer than David.

Read the passage below. Then answer the questions that follow.

Pirates and the Spanish explorers from the 1500s had much in common. Both groups used ships to travel and explored new areas. The Spanish looted the lands they explored, filling their ships to the brim with gold and treasure to carry back to Spain. Pirates also ransacked the places they explored and filled their ships with the treasure they found.

There are also major differences between pirates and the Spanish explorers. Pirates would explore new areas to steal from the explorers. Many Spanish explorers traveled because they wanted to bring glory to their countries. Pirates traveled because they wanted to get rich quick.

It is hard to say if pirates and explorers are truly alike. Many people would say yes since they both explored and brought back treasures. Others would say no because most explorers had good intentions when they traveled. Pirates only had one intention: to get rich.

When you **skim**, you look quickly through a selection to find out what it is about. You look for its main idea and important details.

When you **scan**, you run your eyes through a text looking for a specific word or phrase. You don't read every word.

Read the information below. Then answer the questions that follow.

How to Scan for Information

When you scan for information, follow these steps.

- Identify the key words and phrases that you are looking for.
- Pass your eyes over each line of print quickly.
- Don't stop until you see your key word or phrase.
- Double-check to be sure that you have found the information.

1. Why would it not have been useful to skim the passage above the box?

2. If you're looking for key words and phrases, are you skimming or scanning? _____

3. Which of the following is the best key word or phrase that you would use for scanning?

- a.** hammerhead **b.** sharks **c.** marine life

4. Which do you think is more useful, skimming or scanning? Explain your answer. _____

Characters are the people, and sometimes animals, that you read about in a story. The main character is the story's most important character. Pay attention to the things characters say, do, and feel to compare how they change throughout the story.

Read the following passage. Then answer the questions that follow.

Brian said to his mom, "I'm worried about going to art camp. I won't know anyone there."

"Don't worry about it," his mom said. "You'll see. It'll be fine."

When Brian walked into the camp meeting room, he swallowed hard. Most of the tables were full of kids talking and laughing with each other. There was only one spot open, and it was at a table way in the back.

There were three other kids at the table—Alex, Kenya, and Mike. They all knew each other, but they were happy to talk to Brian, too. Brian no longer felt nervous. By the time he went home, he knew he had a new set of friends for the summer.

1. Who is the main character? _____

2. Name the other characters in the story.

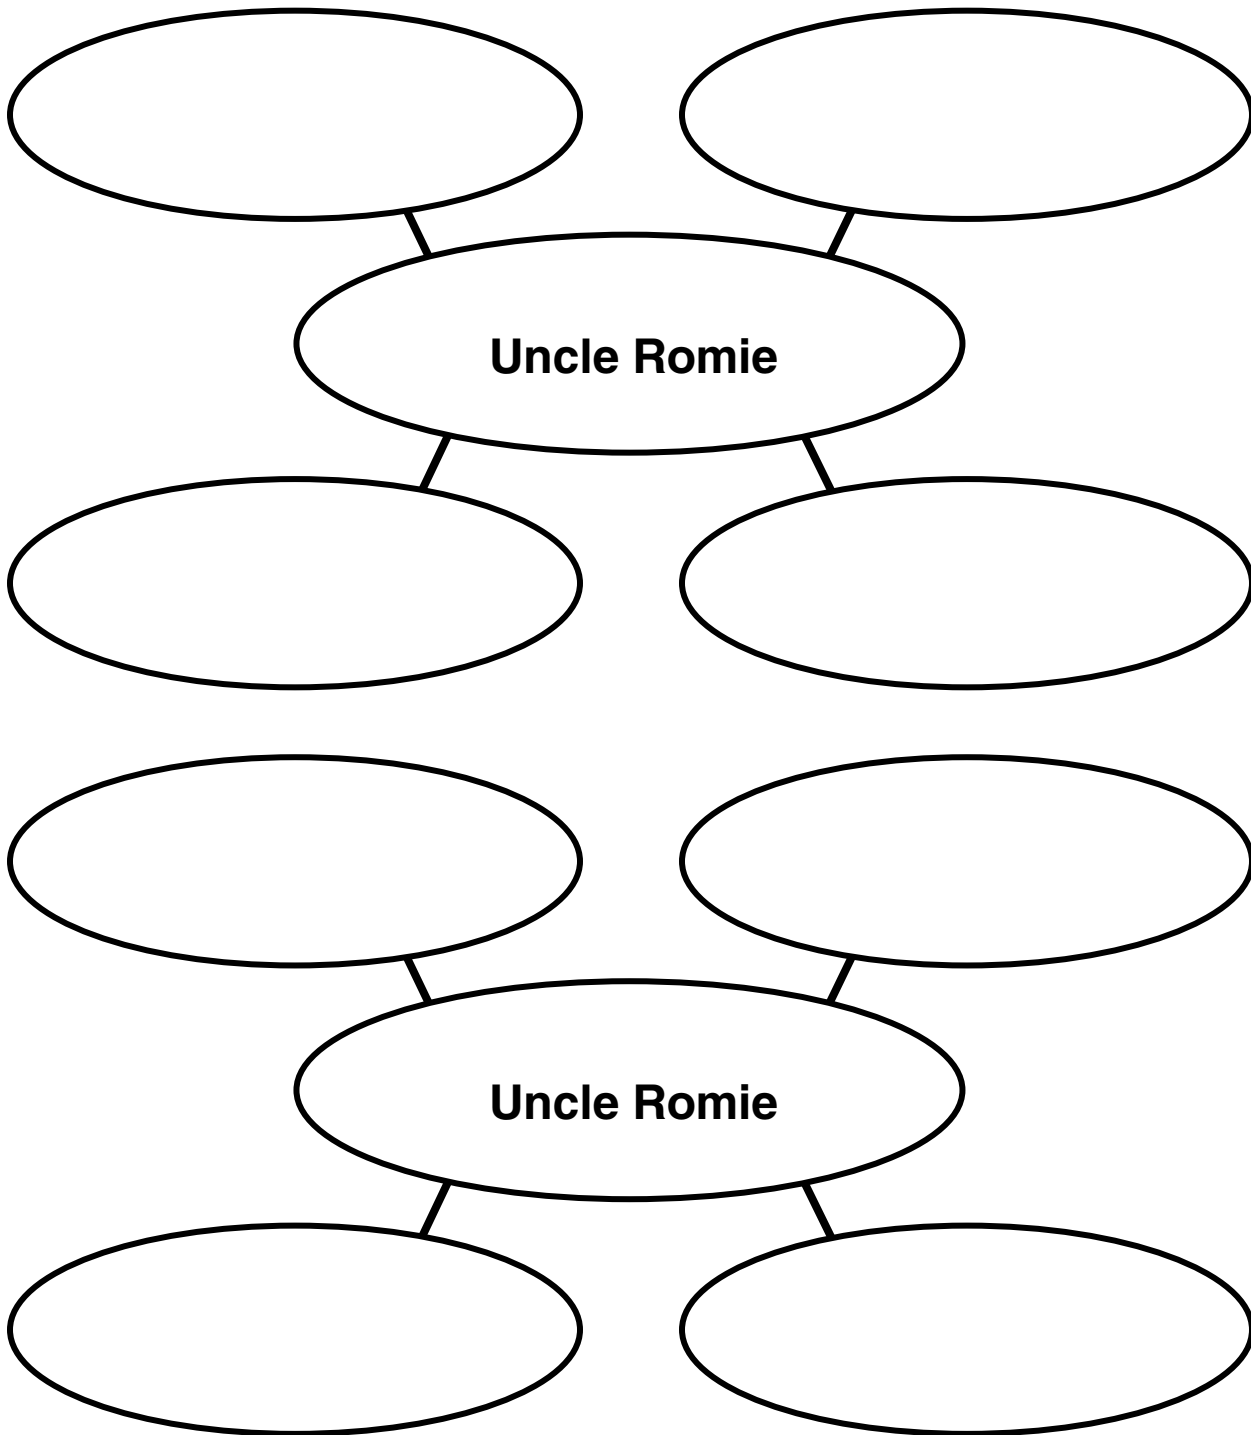

3. What kind of person is Brian in the beginning of the story? _____

4. How did Brian change at the end of the story? _____

Carly held her breath as the broad-tailed hummingbird
 8 fluttered near the cluster of wildflowers. She stared into
 17 her camera, waiting. A fly landed on Carly's arm. She
 27 **flicked** it away with a finger. The bird flew near a flower.
 39 The flower wasn't red enough, though. Carly waited.
 47 The bird flew to another flower. This one was too small.
 58 Finally, the bird hesitated over the largest, reddest flower.
 67 Carly began to snap pictures. She was certain that these
 77 would be some of the best pictures she had ever taken.
 88 Carly raced home and uploaded the pictures onto her
 97 computer. She couldn't wait to see the results.
 105 But when the pictures came up on the screen, she was
 116 disappointed. Carly studied them, then opened her photo

Read the passage below. Then answer the questions that follow.

Every spring my family goes on a camping trip. My parents like to get out of the city, and they want my brother and me to enjoy nature. When we first leave the city I’m always surprised by the quiet. There are no more sirens or blaring horns because there is no traffic.

Since we love to “rough it,” we bring only what we really need. We have sleeping bags, cooking equipment, and food. We set up camp near a mountain river. Because the river water comes from melting snow, we keep food that can spoil in a container in the water. We put a big rock on top so our food doesn’t float away.

Our week in the mountains is fun for the entire family. It brings us together and, for a little while, we forget about our hectic city lives. We all look forward to our yearly camping trip when we all slow down and enjoy the peace and beauty of nature.

1. What causes the family to go on a camping trip every spring?

2. What is the effect of driving where there is no traffic?

3. What causes the river’s cold temperature? _____

4. What effect does the yearly camping trip have on the family?

As I read, I will pay attention to my pronunciation of vocabulary words.

10 By the 1800s, huge herds of wild horses were roaming the
open range.

12 Picture this: You must catch a wild animal that can run as
24 fast as a train. You must tame that wild animal by riding on its
38 back. You must teach that animal to follow your every command.
49 And you must trust that animal with your life.

58 That is exactly what cowboys did when they caught, tamed,
68 and rode wild mustangs.

72 Capturing a wild mustang was a team effort. One cowboy
82 could not do it alone. Cowboys rode together on tamed horses in
94 order to catch the wild mustangs. The cowboys used their fastest
105 and strongest horses to chase the wild mustangs.

113 When the wild mustangs were exhausted, the cowboys drove
122 them into a fenced corral. The mustangs couldn't see the fence
133 until it was too late. Tired and thirsty from the long chase and

What happens as a result of the cause is the **effect**. If you can answer the question “What happened?” then you know the effect.

Read the passage below. As you read, think about causes and effects. Then answer the questions.

Sam Brannan was a merchant in San Francisco. When he heard that gold had been found near the American River, he knew just what to do. He bought up every pickax, shovel, and pan in the entire city. Then he ran through the streets of San Francisco spreading the news about the discovery of gold.

Because Brannan was the only merchant who had tools to sell, he could charge as much as he wanted. Prospectors were willing to spend \$15.00 for a pan that was worth only 60 cents. It wasn't long before Brannan became one of the richest men in California—without ever panning for gold!

1. What caused Sam Brannan to buy up all the mining tools?

2. What was the effect of Brannan's spreading the news about gold?

As I read, I will pay attention to pauses, stops, and intonation.

In the early 1800s, the United States needed room to grow.
 10 Most people lived in the East. The cities were crowded. New land
 22 was expensive. Young families couldn't afford to buy farms.
 31 Then the United States government purchased land from
 39 France. The government also acquired land from Mexico. Soon the
 49 country stretched all the way to the Pacific Ocean. People looked
 60 to the setting sun with **outstretched** arms and said, "Go west!"
 71 Settlers rode in wagons or on horses. They followed long, dusty
 82 trails across hot plains for thousands of miles. There was no shelter.
 94 People slept in tents on the ground. They had to watch out for wild
 108 animals like wolves and snakes. The trip west could take months.
 119 Then a railroad was built that stretched from the East Coast
 130 almost to the West Coast. The railroad made travel faster. More
 141 people poured into the new lands. The settlers quickly built small
 152 towns where the farming, fishing, and mining were good. 161

The **main idea** is what the selection is about. **Details** support and give information about the main idea.

Read each paragraph and answer the questions that follow.

Scientists are not sure what caused dinosaurs to go extinct. But they have theories. One theory is the Sun moved too close to Earth and dinosaurs died from exposure to heat. Another theory is that a meteor crashed into Earth, killing all life. Hopefully one day scientists will know for sure!

1. What is the main idea of this paragraph? _____

2. What details support the main idea? _____

Scientists use fossils to learn more about the lives of dinosaurs. Dinosaur fossils have been found in nearly all the continents of the world. Because of the location of the fossils, scientists can figure out where on Earth dinosaurs lived. Scientists also use fossils to figure out the physical appearance of dinosaurs. Tyrannosaurus rex was about 40 feet long while Compsognathus was about the size of a chicken! Fossils have taught us much about dinosaurs.

1. What is the main idea of this paragraph? _____

2. What details support the main idea? _____

Thousands of years ago pharaohs ruled the great kingdom
 9 of Egypt. When pharaohs died, they were buried in tombs
 19 with their treasures. One of these pharaohs was very young.
 29 His name was King Tutankhamen (TOOT - ahngk - ah - muhn).
 34 The entrance to Tutankhamen's tomb was well hidden.
 42 The Egyptians built tombs that were hard to find and even
 53 harder to enter. They made secret entrances and false passages.
 63 Soon after the king was buried, robbers broke into the
 73 tomb and took some of the treasures. The tomb was then
 84 resealed. It stayed buried in the sand for thousands of years.
 95 In the early 1900s, an Englishman named Lord Carnarvon
 103 began the search for this pharaoh's tomb. Carnarvon believed
 112 that the king was buried in the Valley of the Kings.
 123 In 1907, Carnarvon began working with a man named
 131 Howard Carter. Carter was an artist for **paleontologists**.
 139 He made drawings of the **fossils** and other findings. Carter
 149 and Carnarvon began a search for King Tutankhamen's
 157 tomb. It was a search that would last for many years. 168

An **author's purpose** is the reason he or she wrote the selection.

Read each passage. Then answer the questions that follow.

One thing that everyone hates about flying is the seat arrangement on planes. Most economy seats in an airplane don't have enough leg room for people to comfortably stretch out their legs. This becomes a problem for people whose flights are more than a couple of hours long. Also, the seats and aisles are so small that it is hard for people to get in and out of their seats without disturbing the people around them. This is a problem that anyone flying for the first time should know about.

1. What is the author's purpose? _____

Packing for a trip can be hard for someone who hasn't ever done it before. There are a couple of things every first time packer should know. The first thing you should do is check the weather at the place you are going to. If it's going to be cold there, you should pack a lot of sweaters and warm clothing. If it's going to be hot there, you should pack clothing that will allow you to keep cool. After you've found out the temperature, make a list of the things you need to bring. This will make packing much easier!

9 In 1903 Wilbur and Orville Wright built an airplane with
 20 an engine. They became the first people to fly a power-driven
 30 aircraft safely. Flight became safer and more popular in the
 39 decades after the Wright Brothers' first flight. Many people
 49 dreamed of becoming pilots. James Banning was one of them.

61 Banning knew that learning to fly was not going to be easy
 71 for him because of racial segregation. Blacks and whites usually
 80 attended separate schools, ate in separate restaurants, and drank
 90 from separate water fountains. There were many people who did
 100 not think African Americans should have the opportunity to be
 106 pilots. But James Banning was determined.

116 James Banning was born in the territory of Oklahoma in 1899.
 126 His parents, like many other formerly enslaved people, had moved
 137 there after the Civil War. The Homestead Act allowed them to
 149 claim 160 acres of land to farm. They hoped to have better lives
 far from where they had worked as captives. 157

Writers use **relevant facts and details** to give their readers interesting facts and details about a topic. Relevant facts and details help readers better understand the main idea.

Read the passage. Then answer the questions that follow.

The Life Cycle of the Ant

Egg

Ants begin life as tiny white or yellowish eggs. The eggs are oval in shape and less than 1/16th of an inch long. They hatch in two to six weeks.

Larva

Larvae look like small white worms. They don't have legs, and they can't move much. They grow for several weeks to several months. Larvae shed their skin over and over as they grow.

Pupa

During this stage, the ants change into their adult bodies. In the end, they look like white ants. Their legs and antennae are snug against their bodies. After this stage, they are full-grown.

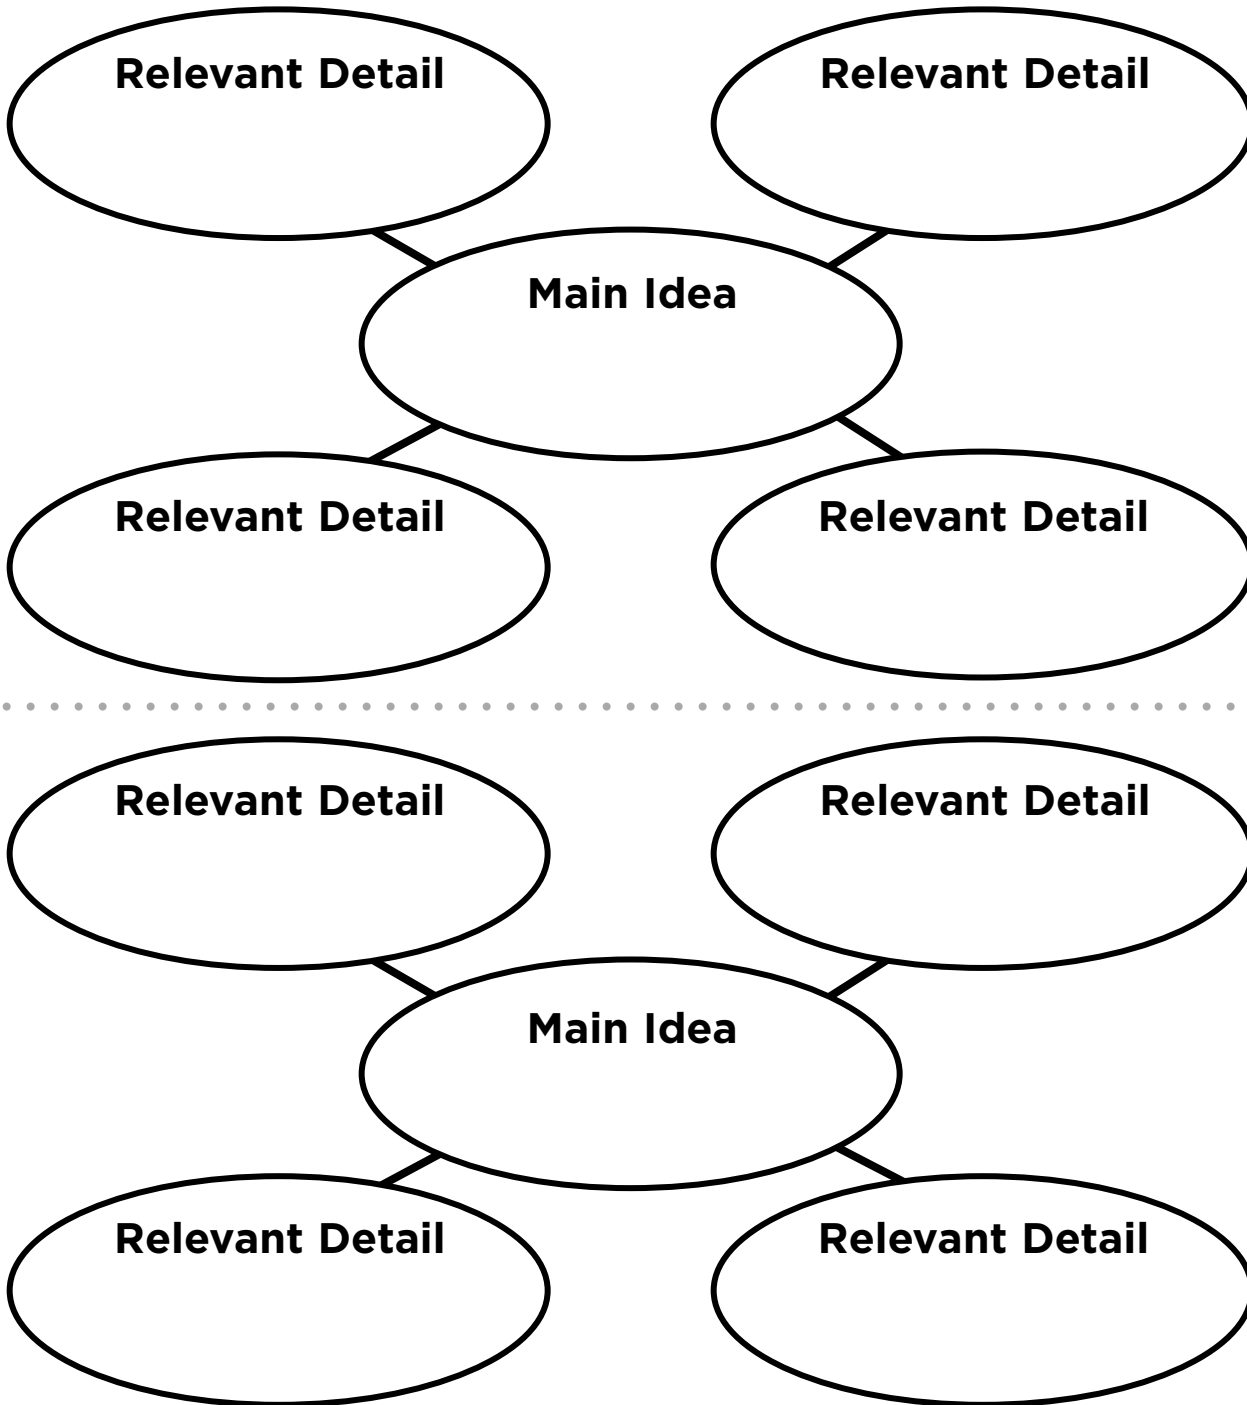

1. Give two details from the passage that relate to the main idea.

2. Why does the author mention the detail that the eggs are 1/16 of an inch long? _____

A **fable** is a short story that teaches a lesson, or **moral**. Fables often have animal characters that behave like people. The **plot** of a fable or other story is what happens in the story.

Read each fable and answer the questions.

A fire ant fell into a river and started to panic. A dove saw this happen, plucked a leaf from a tree, and dropped it near the ant. The ant climbed on the leaf and got safely to shore. “Thank you,” said the ant. “I wish I could repay you for your help.” The dove waved her wing and flew away. Soon after, a hunter came by and aimed at the dove. The ant ran up to the hunter and stung him on the foot. The hunter missed his target.
