## Railroad Tunnel Lengths

The table below shows the five longest railroad tunnels in the world.

| Tunnel | Location | Year Completed | Length in Miles |
| :--- | :--- | :---: | :---: |
| Seikan | Japan | 1988 | 33.46 |
| Channel | France/England | 1994 | 31.35 |
| Moscow Metro | Russia | 1979 | 19.07 |
| London Underground | United Kingdom | 1939 | 17.30 |
| Dai-Shimizu | Japan | 1982 | 13.98 |

Use estimation to answer the following questions.

1. Which two tunnels have a combined length of about 60 miles?
$\qquad$ and $\qquad$
2. Which of the following is closest to the combined length of all five tunnels?

Choose the best answer.
$\bigcirc$ Less than 90 miles
Between 130 and 160 miles
$\rightleftharpoons$ Between 90 and 130 miles
$\subsetneq$ More than 160 miles
3. Explain how you solved Problem 2.
4. About how many miles longer is the Channel Tunnel than the Moscow Metro Tunnel?

About $\qquad$ miles

Try This
5. The Cascade Tunnel in Washington State is the longest railroad tunnel in the United States. It is about $\frac{1}{4}$ the length of the Seikan. About how long is the Cascade Tunnel? About $\qquad$ miles

## Practice

6. $190+b=200 \quad b=$ $\qquad$ 7. $g-500=225 g=$ $\qquad$
